

# + ISC-201A

Created for mid entry level applications, is compatible with all proximity cards or keys in any format. It is ideal for small installations requiring proximity card access, or for remote locations when used in an online system.

- **Cost effective** : ISC-201 is a fully programmable access control system. Programming can be done directly from the unit or from software.
- **Easily interfaced** : The IntelliScan reader interfaces with all existing Wiegand protocol access control systems. The facility code and card numbers of the cards are represented in a Wiegand format.
